

Identify the Incorrect Commands:

1. chmodx is used to change file permissions.

Ans - FALSE (chmod command used to change file permissions not chmodx).

2. cpy is used to copy files and directories.

Ans - FALSE (cp command used to copy file and directories not cpy).

3. mkfile is used to create a new file.

Ans - FALSE (touch command is used to create a new file).

4. catx is used to concatenate files.

Ans - FALSE

5. rn is used to rename files.

Ans - FALSE (the correct command is mv to rename the file).
